Colors

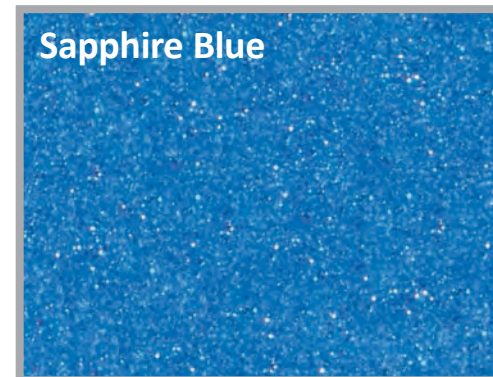

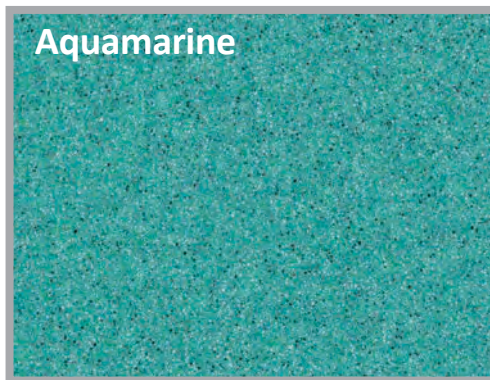

Leisure Pools® SMART Range

Leisure Pools® has a long history of offering its swimming pools in a range of colored gel coats. In 2002, Leisure Pools® introduced Aquaguard™ colored gel coats into the North American market, a time when most other manufacturers were offering plain, white colored swimming pools. As a result of Leisure Pools'® initiatives in North America, it has changed the industry, and has been one of the catalysts driving the increase in market share that the fiberglass industry has been experiencing.

If you're looking for something a little bit special - then this is the color range for you! These colors are given an added brilliance by having a built-in sparkle and shimmer effect. In different lights your pool will look like it has millions of diamonds scattered over the pool surface.

The Leisure Pools® SMART Color Range looks beautiful, has excellent UV, blister, and chemical resistance, and is backed by the largest supplier of gel coats for the swimming pool industry.

The Leisure Pools® SMART Color Range has been designed with dramatically reduced VOC (Volatile Organic Compounds) emissions, providing up to 50% less VOC emissions than standard gel coats making it better for the environment over traditional gel coats used in fiberglass swimming pools.

nuplex®
composites
